

## 5-HT<sub>1B</sub> Receptor Antagonists – New GPCR Focused Library from OTAVA

An excellent basis for designing subtype-selective serotonergic drugs!

As a Director of Otava Ltd., I would like to offer you our new receptor-based **target-focused library of 5-HT antagonists (1,836 compounds in total)** which is specifically targeted towards 5-HT<sub>1B</sub> receptor in such a way to minimize cross-reactivity with 5-HT<sub>2B</sub> receptor. This has been achieved by inspection of active site's critical structural determinants for ligand recognition, validation of reference set of 26 known 5-HT antagonists and exclusion of predicted 5-HT<sub>2B</sub> binders from the final set of compounds by similarity analysis and docking score cut-off filtering.

[Find out more...](#)

Our price is **ONLY \$6.8** per 1mg (if 1,000+ compounds are ordered)

### Example price list in USD:

Qty/ number	1- 10	11- 20	21- 50	51- 100	101- 500	501- 1000	1001- 5000
1 mg	\$38.3	\$32.7	\$21.5	\$19.4	\$12.2	\$9.5	\$6.8

We offer **15% Academic Discount** for this focused library until Dec 31, 2013

**All compounds are in stock, cherry-picking is available.**

The library (DB, SD, XLS, PDF format) as well as the price-list is available [on request](#)

Feel free to contact me if you are interested to obtain this library or if you need more information. I am looking forward to your reply.

Best regards,  
**Andriy Dmytrenko, MBA**  
Director of Business Development and Marketing
