
Tangible Screening Compounds Collection

Exclusive screening compounds from Otava

As a Director of Otava Ltd., I would like to offer you our collection of **Tangible Screening Compounds** that comprises about **500,000 compounds** having a high likelihood of being synthesized.

These are **chemically feasible compounds** that can be produced with synthetic schemes that have been validated. Compounds ordered from this collection could be individually **synthesized and delivered within 4 weeks**.

This is your unique opportunity to enrich your company's screening collection with compounds which are not available from other vendors.

Compound details:

- Purity: 90%+ (by NMR and/or GC/LC/MS)
- NMR spectra are available upon request
- Packaging in deep-well plates or bar-coded vials
- Weighing out is free.

The Tangible Screening Compounds Collection is available for **download** and **on-line search and quotation**

Feel free to contact me if you are interested to obtain this library or if you need more information.
I am looking forward to your reply.

Best regards,
Andriy Dmytrenko, MBA
Director of Business Development and Marketing
